

## Parameters

### Online Course

**Location:** This is a 3hr online course, conducted via the web & phone

**2010 Schedule:** March 16, June 29, Sept 21

(also scheduled upon interest/request)

**Time:** 1:00-4:00pm EST (subject to change)

**Cost:** \$500 per person (Three or more attendees from an organization receive a 10% discount.)

**Registration:** Email the [training registration form](#) (found online) to [training@earthshift.com](mailto:training@earthshift.com)

### COURSE OBJECTIVE

To give our students an understanding of the use of parameters in SimaPro LCA software.

### DESCRIPTION

Take this in-depth course to learn how to best use Parameters in your LCA study. This course will start with a basic review for those who have not yet used parameters in SimaPro. We will then move on to non-linear modeling, linking to Excel data, and SQL queries. This is NOT a course in building SQL queries—trainees who wish to use this feature will be expected to already know how to build an SQL query. Your instructor will be a well experienced LCA/SimaPro professional.

### ORGANIZATION

The class will meet online at [www.gotomeeting.com](http://www.gotomeeting.com). You will be provided with an invitation and password a couple days before the class.

The best set up for taking the class is to have one computer to view the slides and one computer set up with SimaPro to follow along and gain hands on experience. If you would like to take the class but do not have access to the software, we will provide you with a temporary license. Before the class you will receive a print-out of the presentation slides, which you can use for note taking during the class. These prove to be a great help when conducting your future LCA's.

### **PREREQUISITES**

We suggest that students have either previously taken our LCA in SimaPro online or onsite courses or have a working knowledge of conducting LCAs within SimaPro.
