

Offers for Universities

Teaching and Practical Training

Methods and tools for industrial ecology, corporate and environmental management, product improvement and process optimisation are part of the curriculum at many universities today.

Umberto is ideally suited to get these methods, across to the students: material and energy flow analysis, life cycle assessment, environmental information systems, documentation and support of the continual improvement as part of the environmental management system, development of the company under sustainability aspects, technology assessment etc.

The version Umberto educ is tailored for use in education and allows students to learn how to use the standard software for material and energy flow management. Well documented tutorials are provided and can be used immediately in seminars or practical courses. PC trainings parallel to actual projects with partners from industry have turned out to be very successful.

Some universities that integrate Umberto in their courses or for research projects. More than 50 universities worldwide use Umberto.

Research

But Umberto is not only used as a software for training purposes. It has established itself as modelling tool in research projects at many universities. A comprehensive documentation and transparency regarding the methods used, the adaptability and flexibility of the system – along with the comfortable user interface – fully satisfy the high requirements for a software tool to be used in scientific research. For non-commercial research projects the versions **Umberto academic consult** or **Umberto academic business pro** are the most suitable. The version **Academic Umberto Viewer** can be used for purposes of presenting or transferring results of projects to research partners.

New innovative concepts require experience and in-depth know-how. This is why many universities rely on a cooperation with ifu in order to benefit to a maximum extent in common research projects.

Diploma or Master Thesis

Universities educating with Umberto or using an Umberto academic consult licenses for research have the opportunity to purchase a temporarily limited license of Umberto academic consult for diploma thesis. It is also possible to purchase it for diploma thesis that are advised by the university and an enterprise together. To harness the results which mostly were worked out with much commitment, ifu provides professional attendance of the work. This opens the opportunity of continuing the enhancement or update of a model without any interruption.
